

About the author of this book:

JOHN MASON BROWN, a Kentuckian by birth, has been an avid collector of old documents relating to Kentucky history all his life. He brings, therefore, to this biography of Daniel Boone a personal interest and enthusiasm which, coupled with a distinguished writing style, make his book an outstanding contribution to American literature.

Well known throughout the country as a drama critic, lecturer, and Associate Editor of *The Saturday Review*, Mr. Brown is also the author of numerous other books, including *To All Hands* and *Many A Watchful Night*, based on action seen at first hand in World War II, and *Morning Faces*, a delightful book about children written out of his experience as a parent.

About the illustrator of this book:

LEE J. AMES was born in and still lives in New York City. As far back as he can remember he has "always been drawing pictures." His experiences include doing animated motion pictures, magazine illustrating, and teaching veterans. His real love, however, is young people's books. He is the illustrator of *The Pony Express* and *The Santa Fe Trail* (both in the Landmark series), *Three Conquistadores* and *Andrew Jackson*.
