## Lesson Subtract a One-digit Number from a Two-digit Number

| Objectives | California Standards |
| :--- | :--- |
| - Subtract a one-digit | NS 1.1: Count, read, and write whole numbers to |
| number from a two-digit | 100. |
| number without | NS 1.4: Count and group objects in ones and tens |
| renaming. | (e.g., three groups of 10 and 4 equals 34, or 30 |
|  | +4). |
|  | NS 2.6: Solve addition and subtraction problems |
|  | with one- and two-digit numbers. |
|  | AF 1.1: Write and solve number sentences from |
|  | problem situations that express relationships |
| involving addition and subtraction. |  |
|  | AF 1.2: Understand the meaning of the symbols +, |
|  | ,$-=$. |
|  | MR 1.1: Determine the approach, materials, and |
|  | strategies to be used. |
|  | MR 2.1: Explain the reasoning used and justify the |
|  | procedures selected. |
| Materials | Vocabulary/Phrases |
| - Base-10 blocks and | Subtract |
| rectangle cutouts | Count back |
| - Number cards | Ones |
| - Sign cards | Tens |

| Teaching Strategies |  |  |
| :--- | :--- | :--- |
| Subtraction <br> of a one- <br> digit <br> number <br> from a two- <br> digit <br> number | Write the subtraction sentence "58-2 <br> e?" on the board (or display it using <br> number cards and sign cards). <br> Get students to make up a subtraction <br> story for this sentence to help them <br> recall the concept of subtraction. <br> Remind students that subtraction is <br> similar to removal or taking away. <br> E.g., <br> There are 58 pelicans at the lake. Two <br> of them fly away. How many are left <br> at the lake? <br> Revisit the contents on Textbook p. <br> 37 for a review of subtraction. <br> Point out that 58 is 5 tens and 8 ones. <br> Represent "58" using base-10 blocks <br> and single rectangle cutouts. Illustrate <br> the removal of 2 rectangle cutouts. |  |
