

Exercise 2 : Probability Experiments

1. There are green, red and blue balls in a bag. Jack drew 5 balls from a bag each time.

The line plot shows the number of green balls drawn on 5 tries each time.

- (a) How many times did he draw only 1 green ball for every 5 tries?

- (b) How many times did he draw 4 green balls for every 5 tries?

- (c) How many 5 tries did Jack attempt?
