Color the objects with two different colors. Fill in the number bond.

**Concept:** Build number bonds for 5 and 6.
**Introduction:** Give the child 5 linking cubes, linked. Ask the child to separate the cubes into two sets in various ways to find different ways to make 5. Help the child fill in number bonds for each. Guide the student in deciding which circle is for the total, and which are the parts. Repeat with 6 linking cubes.
