✍ EXERCISE 1

What are two main differences between propositional constants and propositional variables?

1. Constants represent one given proposition; variables represent any proposition
2. Constants are abbreviated by uppercase letters, propositions by lowercase

Modify or add to the simple proposition *We have seen God* to create the following:

3. A truth-functional compound proposition:

We have seen God but we will not die.

4. A proposition which is *not* truth-functional:

I think we have seen God.

Circle S if the given proposition is simple. Circle C if it is compound.

- | | |
|---|-------|
| 5. The Lord will cause your enemies to be defeated before your eyes. | (S) C |
| 6. There is a way that seems right to a man but in the end it leads to death. | S (C) |
| 7. The fear of the Lord is the beginning of wisdom. | (S) C |
| 8. If we confess our sins then He is faithful to forgive us our sins. | S (C) |
| 9. It is false that a good tree bears bad fruit and that a bad tree bears good fruit. | S (C) |
| 10. The Kingdom of God is not a matter of talk but of power. | S (C) |

Given that B means *The boys are bad* M means *The man is mad*
 G means *The girls are glad* S means *The students are sad*

Translate the following compound propositions:

11. It is false that B. The boys are not bad.
12. B or G. The boys are bad or the girls are glad.
13. B and M. The boys are bad and the man is mad.

14. If M then S. If the man is mad, then the students are sad.

15. If not M and not S then G. If the man is not mad and the students are not sad, then the girls are glad.
