

The student does **NOT** guess what word goes in the blanks.

- The tutor reads the word, the sentence, and the word again.
- The student attempts the spelling of the word in the blank that is within the sentence.
- The tutor gives the correct spelling of the word.
- The student corrects his/her own spelling. The student then covers up the corrected word and then writes the correct spelling one more time in the blank to the left of the sentence.

The complete script with directions for the tutor begins back on page 10

Things to notice about this book

- Even though the sentences happen to be fairly easy to read (2.0 to 3.0 readability), the sentences don't turn off an adult.
- The students will learn without studying. The tutors will teach without having to correct papers!
- The words are carefully sequenced. Notice **AVKO guarantees** that if the directions are followed, even your most dyslexic student will, on the 5th lesson of the program, correctly spell the word ***you just now asked him to spell (See p. 11)*** even though he has never seen nor studied the word before.
