

# CHEMICAL ENERGY SCAVENGER HUNT

Chemical energy can be found in many unexpected places. See how many of these forms of chemical energy you can find in your house. List any additional forms of chemical energy you find that are not included below.

Check here if found	Forms of chemical energy
	Protein, carbohydrates, and fats—check food labels. These are the molecules in food that contain energy.
	Gasoline in the gas tank of your car, truck, or van
	Candles
	Batteries—list all the places you find them:
	Fireplace—either wood or gas
	Gas stove or oven
	Bar-B-Q Grill—either charcoal or gas
	Gas furnace
	Pet food
	Plant food/fertilizer for your lawn—these chemicals help provide energy for plants to grow
	Water heater—many use natural gas to heat the water
	Lawn mower—most use gasoline
