

GEOGRAPHY TRAILS

Week 8 - South America

Day 1

Name the South American countries counterclockwise in order, starting with French Guiana and ending with Brazil. _____

Which is largest? _____

Day 2

Do the Andes Mountains stretch north and south across South America or east and west?

What term refers to a group of islands? _____

Day 3

How much rain must a forest receive to be called a rain forest? _____

What islands are located east of the tip of South America, and who governs them? _____

Day 4

What empire controlled the Andes Mountains and the Pacific Coast at the time of Columbus's discovery? _____

What is the name of the archipelago located at the equator, west of Ecuador? _____

MAPPING

South America

- Label the Andes Mountain range (shade with light brown).
- Label each country. Use all CAPS.
- Put a circle with a dot on each capital city and label with the city name. Remember to use the same color you have already used to label capital cities.
- Label the Galapagos Islands, Falkland Islands.
- Shade French Guiana. It is not officially a country but a territory of France.

GEOGRAPHY TERMS

- archipelago
- delta
- savanna(h)
- harbor
