

Table of Contents for *Physics*, First Edition

Preface

Lesson 1 Units * Scientific Notation * Significant Digits
Lesson 2 Estimating with Scientific Notation * Precision of a Calculation
 * Unit Conversions
Lesson 3 Vectors and Scalars
Lesson 4 Reference Frames * Average Speed and Average Velocity *
 Mass and Weight * Density
Lesson 5 Vector Equations * Forces in Equilibrium
Lesson 6 Structure of Matter * Temperature
Lesson 7 Linear Motion and Average Velocity * Average Acceleration
Lesson 8 Friction
Lesson 9 Torque
Lesson 10 Motion Graphs
Lesson 11 Galileo * Newton
Lesson 12 Work, Power, and Energy
Lesson 13 Instantaneous Velocity * Instantaneous Acceleration
Lesson 14 Free-Body Diagrams * Elevator Problems
Lesson 15 Static Equilibrium * Beam Problems
Lesson 16 Simple Machines * Efficiency
Lesson 17 Sliding Block Problems
Lesson 18 Bodies in Equilibrium
Lesson 19 Constant Acceleration
Lesson 20 Heat * Specific Heat
Lesson 21 Momentum
Lesson 22 The Derivative * The Area Under a Curve
Lesson 23 Center of Mass
Lesson 24 Freely Falling Bodies
Lesson 25 Radian Measure * Angular Speed and Acceleration
Lesson 26 Fluid Pressure * Weight, Density, and Pressure * Fluids at
 Rest * Pascal's Principle
Lesson 27 Inclined Plane
Lesson 28 Gravitational Theory
Lesson 29 Gravitational Potential Energy * Kinetic Energy *
 Conservation of Mechanical Energy
Lesson 30 Conservation of Momentum
Lesson 31 Snell's Law
Lesson 32 Ideal Gases * Using the Gas Law
Lesson 33 Two-Body Tension Problems
Lesson 34 Colors * Wavelengths
Lesson 35 Circular Motion I
Lesson 36 Archimedes' Principle
Lesson 37 Electric Charge * Electric Current * Voltage * Ohm's Law *
 Resistivity
Lesson 38 Pressure and Volume * Temperature and Kinetic Energy
Lesson 39 Liquids and Solids * Phase Changes
Lesson 40 Wave Motion * Sound Waves
Lesson 41 Hooke's Law * Elastic Potential Energy
Lesson 42 Electric Power * Sign Conventions
Lesson 43 Tension Problems with Friction
Lesson 44 Mechanical Waves * Superposition Principle * Wave
 Reflections * Speed Along a String
Lesson 45 Projectile Motion * Motion of Center of Mass
Lesson 46 Circular Motion II
Lesson 47 Kirchhoff's Laws
Lesson 48 Conservative Forces * A Third Equation for Uniform Motion *
 Kinetic Energy Defined * Dot Product
Lesson 49 Circuit Analysis I
Lesson 50 Vibrating Systems
Lesson 51 Circular Motion III
Lesson 52 Plane Mirrors * Concave Parabolic Mirrors
Lesson 53 Equivalent Resistance
Lesson 54 Rotational Inertia
Lesson 55 Circular Unbanked Tracks * Two Parallel Resistors
Lesson 56 Ideal Fluids * Flow Rate * Continuity Equation **Lesson 57**
 Convex Mirrors

- Lesson 58** Moment of Inertia * Exponential Equations
- Lesson 59** Capacitors * RC Circuits I
- Lesson 60** Thermal Expansion * Phase Changes for Water
- Lesson 61** Bernoulli's Equation
- Lesson 62** Rotational Kinetic Energy * Angular Momentum
- Lesson 63** Simple Harmonic Motion * Conservation of Angular Momentum
- Lesson 64** Banked Tracks
- Lesson 65** Inertia Combinations * Pulleys with Mass
- Lesson 66** Work and Energy * Heat Transfer * First Law of Thermodynamics
- Lesson 67** Prisms * Total Internal Reflection
- Lesson 68** Capacitor Energy * RC Circuits II
- Lesson 69** Converging Lenses * Diverging Lenses
- Lesson 70** Fundamental Forces * Static Charge * Induced Charge
- Lesson 71** The Simple Pendulum * The Physical Pendulum
- Lesson 72** Sinusoidal Motion * Circuit Analysis II
- Lesson 73** Traveling Waves * Doppler Effect
- Lesson 74** Heat Engines * Second Law of Thermodynamics
- Lesson 75** Mirror-Thin Lens Equations
- Lesson 76** Coulomb's Law
- Lesson 77** Equivalent Capacitance
- Lesson 78** Resonance Frequency * Standing Waves * Beat Frequencies

- Lesson 79** Thermodynamic States * The Carnot Cycle
- Lesson 80** Electric Fields * Electron Volts
- Lesson 81** The Otto Cycle * The Refrigerator
- Lesson 82** Magnetic Fields
- Lesson 83** Entropy
- Lesson 84** Dielectrics * Ammeters and Voltmeters
- Lesson 85** DC Motors * DC Generators * Inductance
- Lesson 86** Magnets * Self-Inductance * Mutual Inductance * Bar Magnets
- Lesson 87** Carnot Efficiency
- Lesson 88** Alternating Voltage and Current * Transformers
- Lesson 89** Richter Scale * Decibels
- Lesson 90** Electromagnetic Radiation
- Lesson 91** Speed of Light * Polarization * Wave Theory * Thin-Film Interference
- Lesson 92** Viscous Fluids * Surface Tension * Elastic Properties of Solids
- Lesson 93** The Postulates of Special Relativity
- Lesson 94** The Michelson-Morley Experiment * The Interferometer * The Lorentz Transformation
- Lesson 95** Special Relativity * Simultaneity * Time Dilation
- Lesson 96** Length Contraction * Relativistic Momentum * Relativistic Addition of Velocities
- Lesson 97** The Atom * The Photon * The Hydrogen Atom * Electron Clouds
- Lesson 98** Radioactivity * The Electromagnetic Spectrum * Half-Life
- Lesson 99** Blackbody Radiation * Photoelectric Effect
- Lesson 100** Early Quantum Physics
- Appendices**
- Appendix 1** Selected Tables from Text
- Appendix 2** Periodic Table of the Elements
- Answers**
- Index**
