

Count and circle the correct number.

	
<p>4 2 3</p>	<p>5 4 2</p>
	
<p>3 4 5</p>	<p>2 1 3</p>

Concept: Count to five and recognize the numerals.

Introduction: Hold up five fingers and ask the child how many fingers he/she sees. Hold up the numeral cards for 1, 2, 3, 4, or 5 and ask the child to show you the number with his/her fingers.

One Step Further: Give the child some counters or other small object (up to five) and have him/her guess the quantity before counting.
