## **PREPOSITIONAL PHRASES**

**DEFINITION:** A preposition is a word used to show the relationship between two nouns.

**EXAMPLES:** The package <u>under</u> the tree is mine. (<u>under</u> is the preposition) The package <u>in</u> the tree is mine. (<u>in</u> is the preposition) The package <u>near</u> the tree is mine. (<u>near</u> is the preposition)

#### NOTICE HOW THE RELATIONSHIP BETWEEN THE PACKAGE AND THE TREE CHANGES WHEN THE PREPOSITION CHANGES.

HOW TO FIND A PREPOSITION:

Almost all prepositions will fit into the following little sentence (it's very handy; memorize it!).

### "THE MOUSE GOES \_\_\_\_\_\_THE BOX (OR BOXES)."

Try it out with the prepositions underlined in the three sentences used for examples. They fit, don't they?

#### PREPOSITIONS ARE LABELED "PP."

There are, however, some prepositions that won't fit into the "mouse-box" sentence. There are nine very common ones, which may seem like a lot to remember. Here's a little memory aid: you may not be able to remember them, BUT AL DOES!

**B** = but (but me)**A** = as (as a wink)**D** = during (during recess)**U** = until (until lunch)**L** = like (like a dog)**D** = of (of the homework)**T** = than (than the others)**E** = except (except Bob)**S** = since (since breakfast)

A word may fit into the "mouse-box" sentence and look like a preposition, but IT ISN'T A PREPOSITION UNLESS IT'S IN A PREPOSITIONAL PHRASE. To find a prepositional phrase, you say the preposition and ask, "What?" The answer you are looking for is a noun or pronoun that answers that question. That noun or pronoun is called the OBJECT OF THE PREPOSITION. Each prepositional phrase will -

begin with a preposition, and end with a noun or pronoun. If there are any words between the preposition and its object, they are modifiers for the object.

In the three sentences above, the prepositional phrases are "under the tree," "in the tree," and "near the tree" and "tree" is the object of the preposition in all three phrases.

PREPOSITIONAL PHRASES HAVE A JOB TO DO; THEY ARE ALWAYS MODIFIERS.

Look at the following three sentences:

I ate my lunch before recess.	(the prepositional phrase is "before recess")
I ate my lunch before.	("before" isn't a preposition because there's no object.)
I ate my lunch before I saw you.	("before" isn't a preposition because if you ask, "before what?",
	the answer would be "before I saw you." That's not a prepositional
	phrase because you won't have a verb in a prepositional phrase.)

DIAGRAMING: Sentence diagraming is a tool we use much like drawing a picture. We use diagrams to make it easier to understand concepts which might be hard to understand. Diagrams consist of three types of lines: horizontal (  $\longrightarrow$ ), vertical (  $\mid$  ), and diagonal (  $\setminus$ ).

The basic diagram of a prepositional phrase looks like this:

NOTE: A few prepositions consist of more than one word. They are because of, on account of, in spite of, according to, instead of, contrary to and out of. If you find one of these prepositions, label it "pp" with "wings" (as you do with proper nouns of more than one word).

NAME:

DATE:

**DIRECTIONS:** Mark all the nouns, proper nouns, articles, adjectives, pronouns, and prepositions in the sentences below. Put parentheses around the prepositional phrases. Then, on a separate sheet of paper (and as neatly as you can), diagram the prepositional phrases in each sentence. Sentence #1 has been done for you as an example. Notice that some of the words below are underlined. That will be explained to you on the other side of this page.

(For now, we're not going to worry about what word goes on this line. Just diagram the prepositional phrases and leave that line blank.)

2. A person with a mind for math has the advantage over other people.

- 3. Such people learn concepts about mathematical principles easily.
- 4. They solve problems in <u>math</u> quickly.
- 5. Emotional blocks in your <u>mind</u> prevent success in <u>math</u>.
- 6. A belief in your ability as a mathematician gives you a better chance at success.
- 7. The "gift" of mathematical <u>ability</u> exists in all <u>people</u>.

- 8. A lack of <u>success</u> with certain <u>problems</u> seldom indicates a lack of <u>ability</u>.
- 9. In <u>school</u> we look for the <u>key</u> to <u>success</u> in <u>mathematics</u>.
- 10. Instead of "special" brains with ability in math, we need more hard work!

All the underlined words in this exercise are doing the same job. Look at your notes and write what that job is.

**DIRECTIONS:** Mark all the nouns, proper nouns, articles, adjectives, pronouns, and prepositions in the sentences below. Put parentheses around the prepositional phrases. Then, on a separate sheet of paper, diagram the prepositional phrases in each sentence. The underlined words have to do with additional work on the other side of this page.

- 1. Contrary to popular belief, you use your imagination in math class.
- 2. Early in the history of mathematics, the imagination of <u>mathematicians</u> led to the discovery of each new mathematical theorem.
- 3. The act of mathematical creation involves the use of all <u>one's</u> abilities.
- 4. In most cases, the gift of logic plays only a part in the mathematical process.
- 5. In your classes at school, success in mathematics requires an <u>intuitive</u> sense of the <u>rightness</u> of things.
- 6. You often give the solution to the problem an "educated" guess.
- 7. Sometimes you find the answer without conscious awareness of the creative process.
- 8. In your mind you instinctively know the answer to the problem.

9. Creativity exists in all aspects of math.

**OBJECT OF THE PREPOSITION** 

10. The logical part of your mind is not the only intellectual tool in use.

**DIRECTIONS:** Write what job the underlined words are doing. Choose your answer from among the following:

**MODIFIER** 

<u>SENTENCE #</u>	WORD	JOB
2	mathematicians	
3	one's	
5	intuitive	
5	rightness	
10	logical	

### **SKILLS SUPPORT**

**DIRECTIONS:** Mark all the words in the passage below that you know. Put parentheses around the prepositional phrases. Diagram the prepositional phrases. Then paraphrase the entire paragraph.

Research has failed to show any difference between the sexes in mathematical ability. The perception of math as a masculine domain stems from other myths about the subject. Math is seen as the epitome of cool, impersonal logic - nonintuitive and abstract.

## **PREPOSITIONAL PHRASES: TEST**

NAME:			DATE:
