Learn with our friends:

When you see me, I will help your teacher explain the exciting things you are expected to do.

When you do actions with me, you will learn how to write, draw, match words, read, and much more.

You and I will learn about matching words, listening, drawing, and other fun things in your lessons.

WONDERFUL WORLD OF SCIENCE

Science is fun.
In science I learn to observe
the world around me.
I learn about the earth.
I learn about living things.
I learn about myself.

Objectives

1. I can tell about things I see, hear, smell, taste, and feel.
2. I can show how things I observe are alike and different.
3. I can tell how things I observe will grow or change.
4. I can tell ways my love will make the world better.

I. YOU USE YOUR SENSES

God gave you your senses.

He gave you  .

He gave you  .

He gave you a  and

a  .

With these senses
you can see, hear, smell,
and taste.

God gave you
the sense of touch, too.

You can feel things

with your  and your  .

You can feel things
with your skin.

You use all your senses
to observe the world
around you.

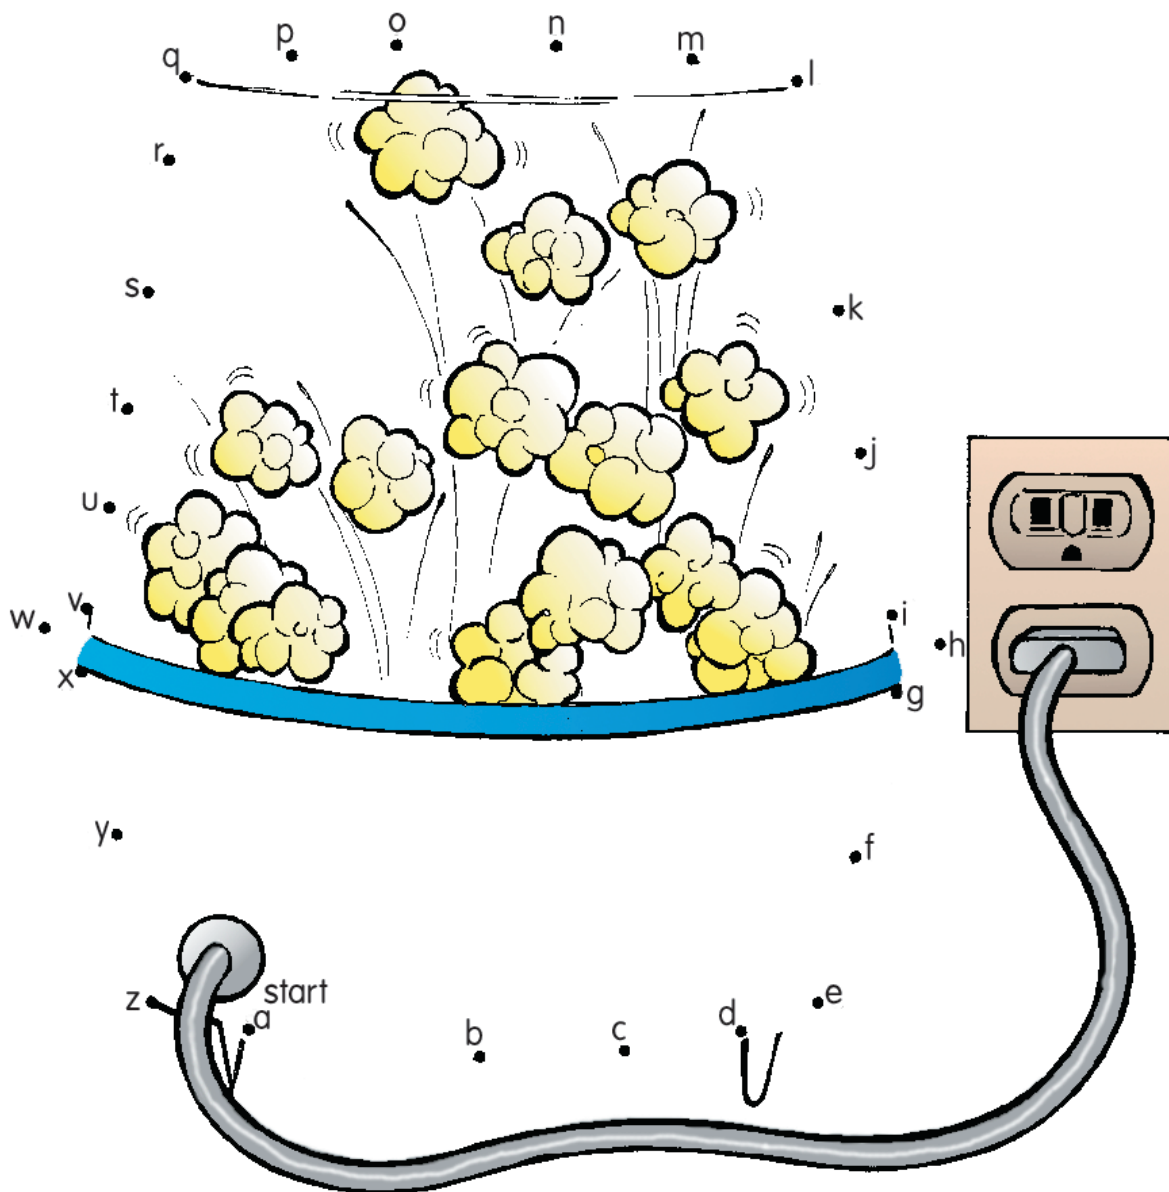

Guess what it is?

You can see it and hear it.
You can touch it and taste it.
It smells so good, too.

Follow the dots to find out.

YOU SEE

All around you are things to see.
You see the shapes of things.
You see the colors of things.
You see the beautiful world.
You see plants and animals.
You see people.
You see the weather.
You see the seasons.
You see energy at work.
