THE HOBBIT

Bag-End—Diorama Project

Bilbo Baggins' hobbit hole is quite fancy and comfortable. Bungo Baggins, Bilbo's father, built it for his wife. It was the nicest hobbit hole around. And Bilbo is a homebody. He is very attached to the comfort and quiet of his nice home.

Using a shoe box make a small model of Bilbo's hobbit hole. Be accurate in the details according to the description given in the book. Remember to consider the shapes and colors of parts of the hobbit hole as well as the furnishings. At least 12 details from the book must be included in the diorama. On a notecard list the 12 details that were included in the diorama.
