

Discovering Design With Chemistry

Preliminary Table of Contents

Chapter 1: Measuring Up..... 1

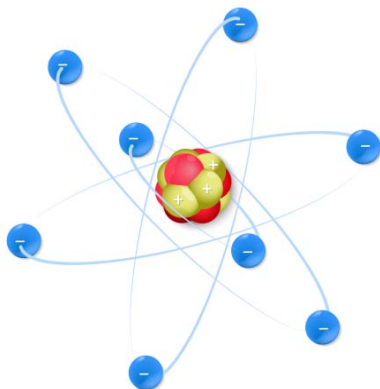

Introduction.....	1
Measuring Distance.....	1
Using Different Units	2
Significant Figures.....	4
Using Significant Figures in Mathematical Problems.....	6
A Relationship Between Units	8
Experiment 1.1: Determining the Relationship Between in and cm.....	8
Converting Between Units	9
Prefixes in the Metric System	11
Scientific Notation	13
Measuring Area and Volume: Derived Units.....	15
Experiment 1.2: Determining the Relationship Between cm^3 and mL.....	17
Converting Between Volume Units.....	18
Measuring Mass	19
Measuring Time	22
Density	22
More on Density.....	25
Experiment 1.3: Density	25
Solutions to the “Comprehension Check” Questions.....	27
Sample Calculations for Experiment 1.1	32
Sample Calculations for Experiment 1.2	32
Sample Calculations for Experiment 1.3	33
Review.....	34

Chapter 2: What's The Matter?..... 37

Introduction.....	37
Mixtures and Pure Substances.....	37
Experiment 2.1: Separating a Mixture of Salt and Chervil	38
Homogeneous and Heterogeneous Mixtures.....	40
Mass Conservation: It's Not Just a Good Idea, It's the Law!	42
Experiment 2.2: The Conservation of Mass	42
Elements and Compounds.....	44
The Law of Definite Proportions.....	47
Experiment 2.3: Oh What a Difference Some Oxygen Makes.....	47
Dalton's Atomic Theory	51
The Law of Multiple Proportions.....	53
What's Wrong with Dalton's Theory: Part One.....	54
What's Wrong with Dalton's Theory: Part Two	58
Solutions to the “Comprehension Check” Questions.....	61
Review.....	64

Chapter 3: Making Sense of Atoms and Elements..... 67

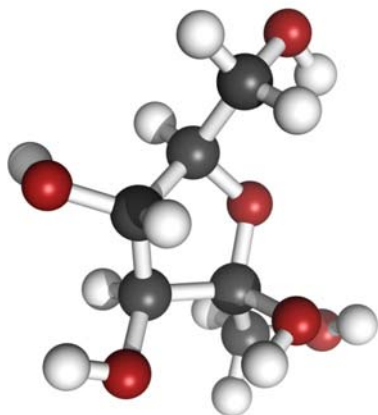

Introduction.....	67
Abbreviating and Arranging Elements	67
Defining the Atoms that Make Up an Element.....	70
Isotopes, Radiation, and Nuclear Weapons	73
Light Waves.....	75
The Electromagnetic Spectrum.....	78
Experiment 3.1: The Wavelength of Microwaves.....	79
The Energy of Light	81
Illuminating the Structure of Atoms: The Bohr Model.....	82
Experiment 3.2: Flame Tests.....	83
More on The Bohr Model.....	87
Spectroscopy.....	89
Solutions to the “Comprehension Check” Questions.....	91
Sample Calculations for Experiment 3.1	94
Review.....	95

Chapter 4: The Modern View of Atoms and Their Chemistry..... 97

Introduction.....	97
Waves, Particles, or Both?.....	97
Experiment 4.1: Interfering Light.....	97
Out with Orbits, In with Orbitals.....	100
Wait a Minute – Do Electrons Really Behave Like Waves?	104
So Where Do You Put These Electrons?	105
What Good Are Electron Configurations?.....	108
Lewis Structures for Elements	110
Metals, Nonmetals, and the In-Betweens	112
Experiment 4.2: Comparing a Metal and a Nonmetal.....	112
Ionic Compounds.....	114
Ionic Compounds that Don’t Follow the Rules.....	117
An Important Characteristic of Ionic Compounds.....	119
Experiment 4.3: Electrolytes and Nonelectrolytes.....	119
Solutions to the “Comprehension Check” Questions.....	122
Review.....	125

Chapter 5: Covalent Compounds and Their Molecular Geometry..... 127

Introduction.....	127
Share and Share Alike	127
Lewis Structures of Covalent Compounds	129
More Complicated Lewis Structures.....	131
Naming Covalent Compounds.....	134
Periodic Properties and How They Affect Covalent Compounds	136
A Consequence of Polar Covalent Bonds	139
Experiment 5.1: Bending Water	140
Molecules in Three Dimensions	143
Is It Polar?	148
Why Is Polarity Important?.....	151
Experiment 5.2: Polar and Nonpolar	151
Solutions to the “Comprehension Check” Questions.....	154
Review	159

Chapter 6: Physical and Chemical Change..... 161

Introduction.....	161
Chemical and Physical Changes	161
Temperature Changes	162
Phase Changes	164
Experiment 6.1: Cool it!.....	165
The Kinetic Theory of Matter	167
Experiment 6.2: In Between and All Around	167
An Important Exception: Water	171
Chemical Reactions.....	172
Balancing Chemical Equations	176
The Mathematical Nature of Chemical Equations.....	180
Formation and Decomposition Reactions	181
Single and Double Displacement Reactions	183
Experiment 6.3: Copper-Plated Nails.....	183
Combustion Reactions	185
Experiment 6.4: Burning Iron	185
Solutions to the “Comprehension Check” Questions.....	189
Review	195

Chapter 7: Stoichiometry..... 197

Introduction.....	197
Counting Atoms	197
Mole Problems – Not Just in Your Backyard	199
Using the Mole Concept	201
Experiment 7.1: How “Wet” Is Hydrated Copper Sulfate?.....	202
Moles Infesting Chemical Equations.....	204
There is a Limit!.....	206
Experiment 7.2: The Limiting Reactant.....	206
Using More Complicated Chemical Equations	209
Stoichiometry Gets Massive	212
Experiment 7.3: The Amount of NaHCO_3 in Alka-Seltzer	216
Solutions to the “Comprehension Check” Questions.....	219
Sample Calculations for Experiment 7.1	223
Sample Calculations for Experiment 7.3	223
Review	224

Chapter 8: Still More on Stoichiometry..... 227

Introduction.....	227
To Err is Human	227
Experiment 8.1: Percent Yield	227
Percent Yield	230
Empirical and Molecular Formulas	232
Determining Empirical Formulas of Metal Oxides.....	235
Determining Empirical Formulas With Combustion Analysis.....	237
More complicated Combustion Analysis	239
Determining Empirical Formulas from Percent Composition.....	241
Polyatomic Ions	243
Solutions to the “Comprehension Check” Questions.....	248
Sample Calculations for Experiment 8.1	253
Review	254

Chapter 9: Chemists Have Solutions.....257

Introduction.....	257
Dissolving Solutes into Solvents	257
Solubility.....	260
Experiment 9.1: Temperature and Solubility	260
Some Ionic and Polar Covalent Chemicals Aren't Very Soluble	263
Experiment 9.2: Forming a Precipitate.....	264
Concentration.....	266
Experiment 9.3: The Importance of Concentration.....	266
Molarity	269
Using Molarity in Stoichiometry.....	270
Molality: Another Unit for Concentration.....	272
This is Depressing!.....	274
Experiment 9.4: Freezing Point Depression.....	274
From Depressing to Elevating	275
Solutions to the "Comprehension Check" Questions.....	280
Review.....	286

Chapter 10: It's a Gas!.....289

Introduction.....	289
How Pressure is Defined	289
Boyle's Law.....	291
Experiment 10.1: Boyle's Law	292
Charles's Law	294
Experiment 10.2: Charles's Law.....	294
Charles's Law and Absolute Temperature.....	295
The Combined Gas Law	298
It's Got To Be Ideal!	300
This Law Is Ideal!	301
Gases in Stoichiometry	304
Dalton's Law of Partial Pressures	306
Vapor Pressure and Boiling Point.....	310
Experiment 10.3: Boiling Water with Ice.....	312
Vapor Pressure and Dalton's Law	313
Experiment 10.4: The Concentration of Hydrogen Peroxide	314
Solutions to the "Comprehension Check" Questions.....	317
Sample Calculations for Experiment 10.4	322
Review.....	323

Chapter 11: Some Pretty Basic (and Acidic) Chemicals 325

Introduction.....	325
Characteristics of Acids and Bases	325
Experiment 11.1: Litmus Tests.....	327
The Chemical Definition of Acids and Bases	329
Acids and Ionic Bases	332
Sometimes, You Can Just Tell.....	333
Determining The Chemical Equation for an Acid/Base Reaction	335
The pH Scale	337
Experiment 11.2: Anthocyanins as Acid/Base Indicators	339
Acid/Base Neutralization.....	341
Acid/Base Titrations.....	343
Experiment 11.3: The Percent of Acetic Acid in Vinegar	345
Diluting Acid and Bases.....	327
Solutions to the “Comprehension Check” Questions.....	349
Sample Calculations for Experiment 11.3.....	353
Review	354

Chapter 12: Reduction and Oxidation..... 357

Introduction.....	357
Oxidation States.....	357
Determining Oxidation States	360
Reduction and Oxidation	363
Experiment 12.1: Oxidation States of Iron.....	366
The Basics of Batteries.....	368
Experiment 12.2: A Simple Galvanic Cell	368
Analyzing Galvanic Cells.....	372
Counting Electrons and Balancing Simple Redox Equations.....	374
Batteries That You Actually Use	376
Electroplating	378
Experiment 12.3: Electroplating.....	378
The Downside of Redox Reaction	380
Solutions to the “Comprehension Check” Questions.....	381
Review	385

Chapter 13: The Heat is On..... 387

Introduction.....	387
What is Heat?.....	387
Calories, calories, and Joules	389
Specific Heat Capacity	391
Experiment 13.1: Specific Heat Capacity.....	391
Measuring Heat.....	393
Calorimetry	395
Experiment 13.2: A Calorimetry Experiment	397
More Detailed Calorimetry Experiments.....	400
Latent Heat.....	402
Experiment 13.3: Melting Ice.....	403
The Heat Associated with Chemical Reactions	406
Experiment 13.4: An Endothermic Reaction	407
Solutions to the “Comprehension Check” Questions.....	409
Sample Calculations for Experiment 13.2.....	414
Review	415

Chapter 14: Thermodynamics 417

Introduction.....	417
Enthalpy	417
Experiment 14.1: Measuring ΔH	418
Enthalpy Change and Bond Energies.....	419
Enthalpy Change and Hess’s Law	422
Enthalpy and Stoichiometry.....	426
Activation Energy	427
Thermodynamics	430
Changes in Entropy	434
Getting Numbers for ΔS	437
The Gibbs Free Energy.....	439
Experiment 14.2: Determining ΔS for a Physical Change.....	442
The Gibbs Free Energy and Hess’s Law	443
Solutions to the “Comprehension Check” Questions.....	446
Sample Calculations for Experiment 14.1.....	450
Review	451

Chapter 15: Kinetics..... 453

Introduction.....	453
Rate Your Reactions	454
What Things Affect the Rate of a Chemical Reaction?	455
Experiment 15.1: Changing the Rate of a Reaction	456
Collision Theory	457
The Rate Equation.....	459
It Lasts Only for an Instant.....	461
Determining Reaction Orders	462
Activation Energy, Temperature, and the Rate Constant.....	467
Catalysts.....	469
Experiment 15.2: Catalysts Don't Get Used Up.....	469
How Catalysts Work	471
Solutions to the "Comprehension Check" Questions.....	476
Review	481

Chapter 16: Chemical Equilibrium..... 483

Introduction.....	483
Establishing Chemical Equilibrium	484
Experiment 16.1: Water in Equilibrium.....	484
The Equilibrium Constant	486
The Chemical Meaning of the Equilibrium Constant	488
Ignoring Things	490
Are We There Yet?	492
Why Salt Melts Ice	494
This is Disturbing	495
More on Le Chatelier's Principle.....	497
Experiment 16.2: Le Chatelier's Principle and Concentration.....	497
Le Chatelier's Principle and Temperature.....	500
Experiment 16.3: Le Chatelier's Principle and Temperature.....	501
Le Chatelier's Principle and Pressure.....	503
Equilibrium Concepts Applied to Acids and Bases	504
All Good Things Must Come to an End.....	507
Solutions to the "Comprehension Check" Questions.....	508
Review	511
