

## Using Berean Builders Science with *Story of the World*

There is no perfect way to synchronize Berean Builders science with a history course, because of the way science progressed. Nevertheless, if you are trying to make your study of science consistent with *Story of the World*, here is how the timeline in Berean Builders science roughly compares to what is found there.

Since *Story of the World* doesn't really deal with creation, the material in *Science in the Beginning* is not covered.

### **Volume 4**

Chapters 1-16: Roughly the rest of the fifth book in Berean Builders Science

If you start *Science in the Beginning* with year 1 of *Story of the World* and then just cover one book each year, your science will always be behind your history. As a result, you will be reviewing the history you learned previously as you study science.

If you would like to complete the entire science series within the four-year span of *Story of the World*, you will need to cover 113 lessons in Berean Builders science each year. That's a full book plus 23 lessons of the next book. While this sounds like a lot, remember that you can skip the "challenge

lessons,” of which there are 18 per year. If you skip the “challenge” lessons, then, you will be covering only a bit more than 90 lessons per year.
